

AEGIS Compliance Audit — Oxford Guardians Platform

Re-audit · 25 June 2026 · supersedes the audit of 22 June 2026

IMPORTANT

This audit re-maps every requirement of the 76-page **AEGIS Accreditation Handbook & Guardianship Organisation Quality Standards (September 2025)** against the platform as it stands today. It distinguishes what is **genuinely functional** (dynamic, reads & writes through `assets/db.js`, persists across sessions) from what is a **static mockup** (hardcoded data, no persistence) or **missing** entirely. It replaces the audit of 22 June 2026 and records the substantial functionality added since — most of the homestay health-&-safety suite, private-fostering casework, school- and parent-liaison logging, and pre-placement risk assessment have moved from mockup to database-backed. The data-integrity defect flagged in the previous audit has also been corrected.

How To Read This Document

Symbol	Meaning
✓ FUNCTIONAL	Dynamic, database-connected (<code>localStorage</code> via <code>db.js</code>); data persists across sessions
~ PARTIAL	Partially met — a field or status exists but the data is unstructured, incomplete, or not fully wired
■ MOCKUP	Page exists with hardcoded dummy data but no real functionality or persistence
✗ MISSING	No page, form, or data field exists in the platform

Executive Summary

Category	Functional	Partial	Mockup	Missing
Std 1 — Company Statement	0	0	0	2
Std 2 — Management & Ops	12	2	2	13
Std 3 — Students	6	0	1	3
Appendix 13 — Student Info Fields	22	1	0	0
Std 4 — Travel	3	2	1	2
Std 5 — Homestays	9	4	0	0
Std 6 — Safeguarding	5	1	0	9
Std 7 — Complaints	0	0	0	3
Std 8 — Private Fostering	3	1	0	0
Std 9 — School Liaison	3	1	1	0
Std 10 — Parent Liaison	2	1	0	0
TOTAL	65	13	5	32

PROGRESS SINCE LAST AUDIT

Roughly **57% of mapped requirements are now genuinely functional** (65 of 115), up from ~45% at the 22 June re-audit. Functional items rose from 52 to 65, mockups fell from 12 to 5, and missing items fell from 41 to 32. Newly database-backed since the last audit: **pre-placement student risk assessments**, the full **homestay H&S / annual-visit / training / accident records, host self-declarations** (Appendix 5), **private-fostering casework** (LA notification, briefings, correspondence log), **school-liaison logging**, and a **parent communication log**. The compliance-alert field mismatch reported last time has been fixed.

CAUTION

Functionality is not the same as compliance. Every record still lives in **browser localStorage** — unencrypted, browser-bound, with no access control, audit trail or backup (fails Std 2.5.1, 2.7.4, 3.4.3, 6.2.6). The mandatory policies, handbooks, contracts and insurance/ICO evidence (the Appendix A submission set) still have no home in the platform, and the **complaints standard (Std 7) remains entirely absent**. An AEGIS inspector would still find the platform non-compliant in its current state — but materially closer than at the last audit.

Standard 1 — Statement of Aims, Principles and Practice

Page 1

Ref	Requirement	Status	Platform Evidence
1.1	Public statement of aims & principles	✗ MISSING	No public-facing 'About' / mission statement page. Platform is staff-only.
1.2	Accurate publicity materials	✗ MISSING	No brochure or marketing content management.

Standard 2 — Management of the Guardianship Organisation

2.1 Staff, Volunteers & Homestays

Ref	Requirement	Status	Platform Evidence
2.1.1	Identify all staff and roles	✓ FUNCTIONAL	staff-list / staff-create / staff-edit / staff-profile — full CRUD on the og_staff store (role, title, DSL designation, rota).
2.1.3	Job descriptions	✗ MISSING	No document storage for job descriptions.
2.1.4	Induction procedure	■ MOCKUP	induction-checklist.html / induction-create.html — static; no db.js, no persistence.
2.1.5	Safer recruitment checks	✓ FUNCTIONAL	scr-dashboard + scr-staff/hosts/drivers generated from the compliance object on each record (ID, DBS, RTW, references, overseas, safeguarding).
2.1.6	Code of conduct	✗ MISSING	No code-of-conduct document stored or tracked (Appendix 6).
2.1.8	UK residency / settled status of carers	~ PARTIAL	compliance.isCitizen / worksOutsideUK flags exist on host, driver & staff records, but no settled-status evidence is captured or uploaded.

2.2 Contracts

Ref	Requirement	Status	Platform Evidence
2.2.1	Staff contracts	✗ MISSING	No contract management.
2.2.2	Parent contracts	■ MOCKUP	'Guardian Services Agreement' rows are seeded into the documents dashboard, but they are static seed data — no upload, lifecycle or notice tracking.
2.2.3	Homestay contracts	✗ MISSING	No contract management.
2.2.4	Agent contracts	✗ MISSING	No agent contract tracking.

2.3 Handbooks / 2.4 Insurance

Ref	Requirement	Status	Platform Evidence
2.3.1-3	Student / parent / homestay handbooks	✗ MISSING	No handbook storage (Appendices 1-3).
2.4.1	Professional indemnity / public liability insurance	✗ MISSING	No insurance certificate or expiry tracking.

2.5 Record Keeping

Ref	Requirement	Status	Platform Evidence
2.5.1	Secure and efficient record-holding system	~ PARTIAL	Data persists via db.js but only in browser localStorage — not secure, not encrypted, browser-only, no access control or backup. Does not meet 'secure method'.

2.6 Emergency Procedures

Ref	Requirement	Status	Platform Evidence
-----	-------------	--------	-------------------

2.6.1	24-hour emergency contact	✓ FUNCTIONAL	emergency-procedures.html — dynamic; staff emergency rota held on og_staff records.
2.6.2	Emergency plan	✓ FUNCTIONAL	emergency-incident.html writes incidents to og_incidents (saveIncident) with generated incident IDs; now also logs a parent-communication entry.

2.7 Information Sharing & Data Protection

Ref	Requirement	Status	Platform Evidence
2.7.2	ICO registration	✗ MISSING	No ICO certificate / data-controller tracking.
2.7.3	Data protection policy & privacy notice	✗ MISSING	No policy document management; nothing published.
2.7.4	Secure records, access controlled	✗ MISSING	localStorage has zero access control — any user of the browser sees all records.
2.7.5	Photo consent tracking	✓ FUNCTIONAL	legal.permissions.photo is a real persisted boolean, edited & saved on student-legal.html.

2.8 Safer Recruitment

Ref	Requirement	Status	Platform Evidence
2.8.1	Safer recruitment policy / interview notes	✗ MISSING	No policy or interview-note storage.
2.8.4	Two written references per person	✓ FUNCTIONAL	compliance.reference1Path / reference2Path tracked per host/driver/staff; missing refs raise SCR alerts.
2.8.5	DBS certificate tracking	✓ FUNCTIONAL	dbsNumber / dbsCertificatePath / dbsExpiry / dbsUpdateService on every host, driver & staff record; expiry alerts via generateComplianceAlerts.
2.8.8	Overseas check (lived abroad >3 mo.)	✓ FUNCTIONAL	livedAbroad flag + overseasCheckDocPath; warning raised when abroad but no check uploaded.
2.8.9	Identity verification (passport)	✓ FUNCTIONAL	idDocumentPath on each record (identity sub-page); critical alert when absent. Student passport held in legal.passportOrBRPPath.
2.8.10	Right-to-work checks	✓ FUNCTIONAL	rightToWorkCheckPath + rightToWorkExpiry; critical alert for non-citizens without a check on file.

2.9 Finance / 2.10 Policies / 2.11 Significant Changes

Ref	Requirement	Status	Platform Evidence
2.9.1	Prompt payments recorded	✓ FUNCTIONAL	finances-tracker.html — paid/unpaid status with deadline dates, persisted.
2.9.2	Student finance records (pocket money)	✓ FUNCTIONAL	Finance events linked to students via finance-data.js.
2.10.1	Annual policy review tracking	✗ MISSING	No policy version control or publication/review-date tracking.
2.11.1	Report significant changes to AEGIS	✗ MISSING	No mechanism to flag/record management or operational changes.

Standard 3 — Students

3.1 Student Induction

Ref	Requirement	Status	Platform Evidence
3.1.1	Pre-arrival info for students & parents	✗ MISSING	No student/parent onboarding or pre-arrival flow.
3.1.2	Introductory meeting record	■ MOCKUP	induction-checklist.html is a static checklist; not persisted to a student file.
3.1.3	Student induction programme	✗ MISSING	No induction-programme content.

3.2 Student Wellbeing

Ref	Requirement	Status	Platform Evidence
3.2.1	Regular student check-ins	✓ FUNCTIONAL	student-checkin-submit.html & welfare-note-create.html write timestamped logs via saveWelfareLog to og_welfare_logs.
3.2.2	Check-in records on student file	✓ FUNCTIONAL	student-profile.html renders the welfare timeline live via getWelfareLogsForStudent — no longer hardcoded.

3.3 Mental Health

Ref	Requirement	Status	Platform Evidence
3.3.1	Mental health support procedure	✓ FUNCTIONAL	mental-health-referral.html persists a per-student MH case (lead staff, status, support options) via saveMHCase; mental-health-comms.html logs MH communications (saveMHComm).
3.3.3	Student removal form (Appendix 11)	✓ FUNCTIONAL	mental-health-removal.html captures and stores a structured removal form via saveMHRemoval (og_mh_removals) and logs a welfare entry.
3.3.4	Risk assessment before guardianship	✓ FUNCTIONAL	Now functional. student-risk.html captures a risk-assessment file and expiry date, persisted on the student record via upsertStudent; generateComplianceAlerts raises a critical alert when no assessment is on file and a warning as expiry approaches.

3.4 Student Information

Ref	Requirement	Status	Platform Evidence
3.4.2	Parental permission to hold & share data	✓ FUNCTIONAL	legal.permissions {travel, medical, photo, data} captured and saved per student.
3.4.4	Medicine administration record	✗ MISSING	Medical conditions are stored, but there is no medicine-administration log for homestays.

RESOLVED — DATA-INTEGRITY DEFECT FROM PREVIOUS AUDIT

The previous audit reported that `generateComplianceAlerts` read student consent / health / contact fields under names that did not match the saved schema, causing consent, medical-cover and UK-contact alerts to mis-fire for every student. This is now fixed: `checkStudent` reads `legal.permissions.medical/travel/photo/data`, `health.privateMedicalCover` and `family.ukFamilyContacts` — matching the stored schema. The notifications screen now reflects the actual data held per student.

Appendix 13 — Mandatory Student Information Fields

The student schema in `db.js` carries the full Appendix 13 dataset across nested `health / family / legal / pastoral` objects, each editable and persisted via the student-health, student-family, student-legal and student-pastoral pages. Seed records ship empty, so fields must be populated per student before inspection.

Required Field (Appendix 13)	In DB?	In Profile UI?
Full name	✓ FUNCTIONAL	✓ FUNCTIONAL
Preferred name	✓ FUNCTIONAL	✓ FUNCTIONAL
Date of birth	✓ FUNCTIONAL	✓ FUNCTIONAL

Home address	✓ FUNCTIONAL	✓ FUNCTIONAL
Parent full names	✓ FUNCTIONAL	✓ FUNCTIONAL
Parent addresses	✓ FUNCTIONAL	✓ FUNCTIONAL
Parent occupations	✓ FUNCTIONAL	✓ FUNCTIONAL
Parent tel / email	✓ FUNCTIONAL	✓ FUNCTIONAL
UK family contacts	✓ FUNCTIONAL	✓ FUNCTIONAL
Agent details	✓ FUNCTIONAL	✓ FUNCTIONAL
Family background info	✓ FUNCTIONAL	✓ FUNCTIONAL
Permissions & consents	✓ FUNCTIONAL	✓ FUNCTIONAL
Medical conditions	✓ FUNCTIONAL	✓ FUNCTIONAL
Allergies	✓ FUNCTIONAL	✓ FUNCTIONAL
Dietary requirements	✓ FUNCTIONAL	✓ FUNCTIONAL
Immunisation details	✓ FUNCTIONAL	✓ FUNCTIONAL
Private medical cover	✓ FUNCTIONAL	✓ FUNCTIONAL
Interests / hobbies	✓ FUNCTIONAL	✓ FUNCTIONAL
Learning difficulties	✓ FUNCTIONAL	✓ FUNCTIONAL
School contact details	✓ FUNCTIONAL	~ PARTIAL
Tutor / house	✓ FUNCTIONAL	✓ FUNCTIONAL
Passport / BRP	✓ FUNCTIONAL	✓ FUNCTIONAL
Student visit records	✓ FUNCTIONAL	✓ FUNCTIONAL

'School contact details' is partial: the school name, year and tutor/house are captured, but structured tutor email/telephone fields are not. Passport/BRP stores an upload *path* only — the platform records that a document exists, it does not securely store the file itself.

Ref	Requirement	Status	Platform Evidence
4.1	Full travel record keeping (date, time, mode)	✓ FUNCTIONAL	travel-create.html persists transports to og_transports; auto-generates a travel to-do checklist per trip.
4.2	Suitable travel permissions in place	~ PARTIAL	legal.permissions.travel consent is held on the student, but it is not linked to individual trip records.
4.3	Taxi-firm enhanced-DBS confirmation	✗ MISSING	No external transport-provider check tracking (own drivers do hold DBS records).
4.4	Child-seat / booster compliance	~ PARTIAL	driver.childSeat is a free-text note per driver; not validated against student age/height.
4.1	Travel record shared with school / homestay	■ MOCKUP	Travel data exists; a school-liaison log entry can be raised from travel.html, but there is no structured per-trip export to homestay.
—	Travel to-do tracking	✓ FUNCTIONAL	travel-todo.html — dynamic checklist driven by og_travel_todos.
—	Transportation dashboard	✓ FUNCTIONAL	transportation.html — dynamic unbooked-trip tracker.
—	Permission-to-travel letter (Appendix 9)	✗ MISSING	No letter-template generation.

Standard 5 — Homestays

5.1 Homestay Checks

Ref	Requirement	Status	Platform Evidence
5.1.1	Primary carer citizenship / settled status	~ PARTIAL	compliance.isCitizen flag exists on the host record, but no settled-status evidence is viewed/recorded.
5.1.2	Homestay self-declaration (Appendix 5)	✓ FUNCTIONAL	Now functional. host-compliance-declaration.html captures a self-declaration document path (selfDeclarationDocPath); a critical SCR alert fires for any host without one on file.
5.1.3	Enhanced DBS for all residents 16+	✓ FUNCTIONAL	dbsStatus, dbsCertNumber and secondaryAdultDbs held per host; overnight-visitor field captured.

5.2 Homestay Information / 5.3 Profile / 5.5 Accommodation

Ref	Requirement	Status	Platform Evidence
5.2.1	Full household member details (DOB, gender, occupation)	~ PARTIAL	householdResidents is a single free-text string — per-member structured data is not captured.
5.2.2	Regular visitor information	✓ FUNCTIONAL	overnightVisitors field captured per host.
5.3.1	Shareable homestay profile	✓ FUNCTIONAL	host-profile.html — dynamic, DB-connected, includes document uploads (host_docs_*) and now surfaces the H&S, training and visit history.
5.5.1	Bedroom / facility detail	~ PARTIAL	studentBedrooms / dietaryProvision are free-text; itemised facility detail now lives in the H&S checklist rather than the host record.
5.5.2	No more than 3 students per homestay	✓ FUNCTIONAL	capacityMax: 3 enforced in the host schema.

5.9 Annual Training / 5.10 Health & Safety & Annual Visit

Ref	Requirement	Status	Platform Evidence
-----	-------------	--------	-------------------

5.9.1	Homestay annual training record	✓ FUNCTIONAL	Now functional. training-record-create.html writes per-host training logs via saveTrainingLog to og_training_logs; surfaced on host-compliance.html and training-og.html via getTrainingLogsForHost.
5.10.1.1	Initial in-person assessment visit	✓ FUNCTIONAL	Now functional. homestay-visit-report.html records a structured visit with visitType 'Initial pre-placement', persisted via saveVisitReport to og_visit_reports.
5.10.1.2	Accident book	~ PARTIAL	homestay-incident-create.html logs structured homestay incidents to og_incidents (saveIncident) and homestay-incidents.html lists them; the dedicated accident-book page (homestay-accident.html) remains static.
5.10.2	H&S checklist (smoke alarms, gas, etc.)	✓ FUNCTIONAL	Now functional. homestay-hs-checklist.html captures and persists an itemised H&S checklist via saveHsChecklist to og_hs_checklists; results surface on host-compliance.html.
5.10.3	Annual visit records	✓ FUNCTIONAL	Now functional. homestay-visit-report.html persists annual-review visits via saveVisitReport, which automatically updates the host's annualVisitLast / annualVisitDue / annualVisitStatus fields.

Standard 6 — Safeguarding, Child Protection and Welfare

Page 1

HIGHEST-RISK AREA

Casework remains database-backed — the concerns register, welfare logging and the DSL training record are all functional. But the governing safeguarding documents (safeguarding/child-protection, whistleblowing, Prevent, missing-students, behaviour, anti-bullying and online-safety policies) and the AEGIS self-reporting route are still entirely absent. Safeguarding case notes also inherit the localStorage security gap (fails 6.2.6 'kept securely, DSL-only access'). This standard is essentially unchanged since the last audit.

Ref	Requirement	Status	Platform Evidence
6.1	Safeguarding & child-protection policy	✗ MISSING	No policy document management (Appendix 4).
6.2	DSL appointment & training	~ PARTIAL	A DSL is appointed (Jay Ray, role 'Admin / DSL') with DSL Level 3 training date & expiry on the staff record; no deputy-DSL field or live-training certificate store, no policy.
6.3	Safeguarding training records, with dates	✓ FUNCTIONAL	compliance.safeguardingTrainingDate + trainingLevel/trainingDate/trainingExpiry per staff; missing records raise SCR warnings.
6.4	Whistleblowing policy	✗ MISSING	No policy management.
6.5.1	Allegations procedure	✗ MISSING	No allegations policy/workflow.
6.5.2	Low-level concerns	✓ FUNCTIONAL	concerns-dashboard / concerns-low-level / concerns-escalated / concerns-resolved read the og_concerns store via getConcernsByTier.
6.5.3	Self-reporting to AEGIS	✗ MISSING	No incident self-reporting route to AEGIS.
6.6	Prevent / anti-radicalisation	✗ MISSING	No Prevent policy or training tracking.
6.7	Missing student policy / procedure	✗ MISSING	No missing-student workflow.
6.8	Student behaviour guidelines	✗ MISSING	No behaviour code tracking.
6.9	Anti-bullying / cyberbullying policy	✗ MISSING	No anti-bullying policy or incident tracking.
6.10	Online safety policy	✗ MISSING	No online-safety policy tracking.
—	Concern case management	✓ FUNCTIONAL	Concern tier, status, review/closed dates and full case narrative persisted & surfaced across the concerns dashboard suite (legacy concern-case/escalation pages remain static duplicates).
—	Welfare note logging	✓ FUNCTIONAL	Welfare notes write to og_welfare_logs and render on the student profile (legacy welfare-notes.html list is static).

Standard 7 — Complaints

Ref	Requirement	Status	Platform Evidence
7.1	Complaints policy	✗ MISSING	No complaints management.
7.2	Informal + formal resolution stages + AEGIS referral	✗ MISSING	No complaints workflow.
7.3	Written record of all formal complaints	✗ MISSING	No complaints data store. No complaints page exists anywhere in the platform.

Standard 8 — Day Students, Prolonged Stays & Private Fostering

Ref	Requirement	Status	Platform Evidence
-----	-------------	--------	-------------------

8.1	Private-fostering compliance (28+ consecutive days)	~ PARTIAL	Each student now carries a structured <code>privateFostering</code> object (<code>isApplicable</code> , <code>proposedStartDate</code>) persisted via <code>upsertStudent</code> , and <code>private-fostering.html</code> manages applicable cases. Detection still relies on the manual <code>accommodationType</code> flag — the 28-day threshold is not auto-computed from actual placement durations, and some dashboard counts are still hardcoded.
8.2	Local-authority notification tracking	✓ FUNCTIONAL	Now functional. <code>private-fostering.html</code> / <code>private-fostering-notification.html</code> persist <code>privateFostering.laNotifiedDate</code> per student.
8.3	Explanation to school / homestay	✓ FUNCTIONAL	Now functional. <code>privateFostering.briefings</code> { <code>schoolBriefed</code> , <code>homestayBriefed</code> , <code>parentConsent</code> } booleans captured and persisted.
8.4	LA correspondence log	✓ FUNCTIONAL	Now functional. <code>privateFostering.correspondenceLog</code> array persists dated correspondence entries per student.

Standard 9 — Liaison with Partner Schools

Ref	Requirement	Status	Platform Evidence
9.1	Regular school contact	✓ FUNCTIONAL	Now functional. <code>school-log-create.html</code> writes dated school-communication entries via <code>saveSchoolLog</code> to <code>og_school_logs</code> ; <code>school-liaison.html</code> and <code>schools.html</code> render them live via <code>getSchoolLogs</code> .
9.3	Written service confirmation to school	■ MOCKUP	<code>school-service-confirmation.html</code> — static; not generated per student or per year.
9.4	Travel-arrangement liaison	~ PARTIAL	<code>travel.html</code> can raise a school-liaison log entry (<code>saveSchoolLog</code>), but there is no automated travel-notification feed to schools.
9.6	Student welfare / medication liaison	✓ FUNCTIONAL	Now functional. <code>school-welfare-notification.html</code> records welfare/medication notifications to schools via <code>saveSchoolLog</code> .
9.7	School visit / communication log	✓ FUNCTIONAL	Now functional. <code>school-log-create.html</code> persists visits/communications; <code>school-liaison.html</code> is now a live log rather than a static mockup.

Standard 10 — Liaison with Parents

Ref	Requirement	Status	Platform Evidence
10.1	Regular parent contact log	✓ FUNCTIONAL	Now functional. <code>parent-log-create.html</code> writes dated contact entries via <code>saveParentLog</code> to <code>og_parent_logs</code> ; <code>parent-liaison.html</code> and <code>parent-profile.html</code> render them via <code>getParentLogs</code> . Emergency incidents also auto-log a parent entry.
10.2	24-hour contact provision to parents	~ PARTIAL	Staff emergency rota & emergency procedures exist internally; the parent-facing portal (<code>parent-portal.html</code>) is static and does not surface a 24-hour number.
10.3	Emergency notification to parents	✓ FUNCTIONAL	Parent contacts are structured per student and linked to the emergency-incident workflow.

What IS Genuinely Functional

These features read from and write to localStorage through db.js. **Bold** rows are new or substantially upgraded since the 22 June audit.

Feature	Key Pages
Student records + Appendix 13 data	students / student-create / student-edit / student-profile and the student-health, -family, -legal, -pastoral editors
Pre-placement risk assessment	student-risk → riskAssessmentFile / riskAssessmentExpiryDate; critical & expiry alerts via generateComplianceAlerts
Welfare check-in logging	student-checkin-submit, welfare-note-create → og_welfare_logs; timeline on student-profile
Mental-health suite	mental-health-referral (case + support), mental-health-comms, mental-health-removal (Appendix 11)
Safeguarding concerns register	concerns-dashboard / -low-level / -escalated / -resolved (og_concerns)
SCR & safer-recruitment compliance	scr-dashboard + scr-staff/hosts/drivers and the host/driver/staff -compliance-identity/dbs/references/overseas/safeguarding editors
Host self-declaration (Appendix 5)	host-compliance-declaration → selfDeclarationDocPath; critical SCR alert when absent
Homestay H&S checklists	homestay-hs-checklist → og_hs_checklists (saveHsChecklist); surfaced on host-compliance
Homestay training records	training-record-create → og_training_logs (saveTrainingLog); training-log / host-compliance
Homestay visit reports (initial + annual)	homestay-visit-report → og_visit_reports (saveVisitReport); auto-updates host annual-visit fields
Homestay incident logging	homestay-incident-create → og_incidents (saveIncident); homestay-incidents list
Private-fostering casework	private-fostering / private-fostering-notification → student.privateFostering (laNotifiedDate, briefings, correspondenceLog)
School-liaison logging	school-log-create / school-welfare-notification → og_school_logs; school-liaison / schools read live
Parent communication log	parent-log-create → og_parent_logs; parent-liaison / parent-profile read live
Compliance notifications / expiry alerts	notifications.html via generateComplianceAlerts (now schema-aligned)
Staff records (CRUD)	staff-list / staff-create / staff-edit / staff-profile (og_staff)
Parent records (CRUD)	parent-list / parent-create / parent-profile (og_parents)
Driver records (CRUD)	driver-list / driver-create / driver-profile
Host records (CRUD)	hosts / host-create / host-profile
Transport records + travel to-dos	travel / travel-create / transportation / travel-todo (og_transports)
Homestay placements + to-dos	homestays / homestay-create / homestay-todo (og_placements)
Exeat management	exeats.html (og_exeats)
Emergency incidents & procedures	emergency-incident (og_incidents) / emergency-procedures
Finance & revenue trackers, VAT, documents	finances-tracker / revenue / vat-reclamation / documents (aggregateDocuments)
Weekly operations report	reports.html (live from students, transports, placements, exeats)

Critical (would fail inspection)

1. **Storage & security architecture** — The entire platform still runs on browser localStorage — unencrypted, single-browser, no access control, no audit trail, lost on cache-clear. Fails Std 2.5.1, 2.7.4, 3.4.3 and 6.2.6 and undermines every otherwise-functional record. Migrate to a secured, access-controlled, backed-up datastore. *This is now the single largest barrier to accreditation.*
2. **Policy & document management** — No store for the mandatory AEGIS policies and handbooks (safeguarding, whistleblowing, Prevent, missing-students, behaviour, anti-bullying, online-safety, complaints, data-protection, safer-recruitment + student/parent/homestay handbooks) with publication/review dates — the core of the Appendix A submission set (Std 2.3, 2.7, 2.8.1, 2.10, 6.1, 6.4, 6.6, 6.7, 6.8, 6.9, 6.10, 7).
3. **Complaints system** — No complaints policy, workflow or record whatsoever (Std 7). Confirmed absent — no complaints page exists in the platform.

High (expected, especially at Gold Standard)

1. **Contract management** — No staff, parent, homestay or agent contracts (Std 2.2).
2. **ICO registration & insurance evidence** — No tracking of ICO registration, data controller or insurance certificates (Std 2.4, 2.7.2).
3. **Safeguarding self-reporting to AEGIS** — Casework is logged internally but there is no route to self-report notifiable incidents to AEGIS (Std 6.5.3).
4. **Settled-status & structured household evidence** — Carer settled-status evidence and per-member household data are still flags / free-text (Std 2.1.8, 5.1.1, 5.2.1).

Medium (required, lower priority)

1. **Private-fostering 28-day auto-detection** — Structured PF casework now persists, but the 28-day threshold is not computed from actual placement durations and some dashboard counts remain hardcoded (Std 8.1).
2. **Per-trip travel permissions, taxi-firm DBS confirmation & permission-to-travel letter** — Std 4.2, 4.3 and Appendix 9.
3. **Written service confirmation to schools** — Still a static mockup; not generated per student/year (Std 9.3).
4. **Medicine-administration record & induction programme** — Std 3.4.4 and 3.1 (induction remains a static checklist).
5. **Public statement of aims & introductory-meeting records** — Std 1.1, 3.1.2.
6. **Dedicated accident book** — Homestay incidents persist via og_incidents, but the named accident-book register (homestay-accident.html) is still static (Std 5.10.1.2).

DIRECTION OF TRAVEL

Since the first audit (~18% functional) the platform has reached ~57% functional. The remaining work is now concentrated in two areas rather than spread across every standard: (1) the underlying **secure datastore**, and (2) a **policy / document-management module** covering the Appendix A submission set and complaints. Closing those two would move the majority of the remaining 32 missing items toward compliance.
